

*** We ARE Different ***

We make every attempt to treat the body system that has been "compromised" and attributing to the animal's distress.

There are a myriad of techniques (not only massage) that can be a source of renewal for the animal. We have successfully treated injured, abused, or over stressed animals (Horses, Dogs & Cats) using **Aromatherapy (Therapeutic Grade Essential Oils), Reiki and Massage.**

Aromatherapy with animals has been just short of miraculous. As used with humans, the OILS can deliver much needed oxygen and nutrients to damaged tissues.

The Therapeutic Essential Oils that we use have chemical properties that are anti-biotic, anti-viral, anti-tumoral, anti-fungal, ant-spasmodic, and, analgesic, when used they greatly enhance the healing of your animal without the use of drugs or chemical medicines that unfortunately carry with them many side-effects, and toxins.

Massage then "pushes" out unwanted toxins, and acids which are contributing to the animal's discomfort and pain. Realigning muscle tissue, strengthening tendons and ligaments, bringing in "fresh" blood and oxygen.

Reiki on the other hand "relaxes" it gives the animal a feeling of contentment that removes the added "stress" attributed with treatments administered by strangers to the animal.

As with humans, Reiki is beneficial to the WHOLE body of the animal, imparting balance and harmony and an overall sense of "well-being".

Does your horse have colic leading to "twisted gut"? Many horses die from this malady every year. Vets using surgical procedures have only about a 25% success rate in saving your horse. Don't wait till your horse contracts this problem, contact us for natural holistic protocols that just may save your precious horse.
