

NOW Let's Learn More About Essential Oils

Academy Health Services of NJ (AHS)

Is a STRONG advocate for the use of therapeutic-grade essential oils for people (and animal pets)

There are volumes of published research on the outstanding ability of therapeutic-grade essential oils to change and support damaged compromised cells and body systems that have been altered due to (toxins, free-radicals, bacteria, fungal and viral infestation).

Our clients benefit from our ability to educate and provide them with an "informed choice" that will FREE them from the "grip" of the allopathic (not natural) community (Most doctors, pharmacists and pharmaceutical companies) with their "over marketed" magic formulas designed to treat the symptoms not the cause of their health maladies. The over-use of drugs today, has disabled many people unfamiliar with "SAFE" alternatives that may improve their health.

There are many Web-Sites and health care practitioners in our society today (world over), offering magic cures for almost anything.

To be completely candid with you, WE would be the first to tell you that Aromatherapy is not an end to itself, there are times when you SHOULD and MUST seek professional medical assistance. In dire emergencies or in case of severe accidents, please call 911, or get proper medical help

AHS, takes pride in our history of SAFE use of OILS, and that is why
