

About Wally's Natural Products

Since the early 1990's, Wally's Natural Products has been dedicated to providing all-natural personal care products. Based in Auburn, California, Wally's began developing safe and natural alternatives for soothing the ear. Reviving the age-old approach of ear candling (the use of hollow tapered "candles" or "cones" to deliver soothing warmth and smoke into the ear), Wally's developed a full line of ear candles and accessories.

Wally's Natural Products has gone to great lengths to provide you with the best quality personal care products, which are available in natural foods stores, natural pharmacies, and mail-order catalogs. Using the best quality materials and precision craftsmanship, Wally's produces the most popular ear candles in America. Our five kinds of ear candles are packaged in 2-packs, 4-packs, 12-packs and in bulk. These include the popular Lavender Paraffin, Plain Paraffin and Herbal Paraffin kinds, as well as our wonderful 100% Beeswax and Herbal 100% Beeswax varieties. The spiral shape of these candles causes the smoke to be directed down into the ear canal. The tapered tip, individually hand-finished, makes Wally's ear candles comfortable to use and provides reliable, consistent performance. We suggest you compare the results of paraffin versus beeswax, and to experience the aromatic, soothing herbal blends with their benefits. Wally's paraffin is the finest food-grade variety, and our beeswax is closely monitored and inspected for quality and consistency. Wally's also offers an all-natural Ear Oil.

Please NOTE:

Wally's has conducted extensive testing to improve the efficiency of the ear candling process. Wally's Natural Products determined, through experimentation with dozens of subjects, that the ear candling process works just as well (and possibly better!) with the person sitting up, allowing the candle to burn horizontally, at about a 5-10 degree angle upward from the ear. The result of this testing has led Wally's Natural Products to promote this new method enthusiastically, influencing hundreds of ear cndlers to better use of the process.
